

WPS Workflow

Client Supplied Files

Word Styles, XML-tagged, HTML-tagged, and more.

Optional: WPS Pre-Edit Stage

1. MS received
2. Cleanup scripts run
3. Paragraph and Character Styles applied
4. Files validated; only WPS styles used
5. Validated files returned to you
6. Files returned to WPS when title ready for composition

Data Conversion

Westchester Publishing Services has its own standardized markup language and tag set

1. Adding new Paragraph and Character Styles, if needed
2. Running WPS Scripts and validate files, to ensure no incompatible styles have been introduced
3. Converted to tagged text files (xtags)

Pagination

1. Paginate
2. Maintain WPS Paragraph and Character Styles throughout passes
3. Update and edit styles as needed
4. Validate before export to digital formats

Output Format

We work with each client to define the appropriate assets for standard bundles, as well as any project-specific requirements. Deliverables can include, but are not limited to:

- PDF (Print)
- PDF (Interactive)
- ePub2 / ePub3
- mobi for Kindle
- Additional eBook customizations
- XML including WPS XML
- Transform WPS XML to an XML standard such as NLM, TEI, DocBook, and more.
